

OUR EXPERT AUDIOLOGISTS UNDERSTAND TODAY'S NEW HEARING AID TECHNOLOGY.

THE WORLD'S FIRST 2.4GHZ WIRELESS HEARING AID.

The strongest connections are the ones you can't see.

Every few years, technology takes a significant leap forward. ReSound Alera gives you the most advanced features ever offered by ReSound. New Surround Sound technology improves hearing in even the most difficult listening environments. Sound is crisper, cleaner and works more like natural hearing to provide a truly advanced listening experience. It's hard to improve on something this powerful, but now with 2.4GHz wireless capabilities, ReSound Alera also connects you to your TV, stereo and phone so you can hear audio directly in your ear without bothering those around you. It makes traditional hearing aids a thing of the past.
